Elephants and Optimality Again
Tamás Biró, CLIN, Jan. 22, 2009

Figure 1: Candidate set 1 (a.k.a. search space, neighbourhood structure, topology) \textit{without} insertion of third elements not present in the context into the reference set.

Figure 2: Candidate set 2 (a.k.a. search space, neighbourhood structure, topology) \textit{with} insertion of third elements not present in the context into the reference set.
